

# Alberta Liberal Action Plan for Forestry

---

- Work closely with forest industry operators to ease the blow from the collapsed U.S. housing market, the high Canadian dollar, and the impact of pine beetle.
- Examine a tax credit for new and recent machinery and equipment installed to improve efficiency and environmental performance.
- Support the development of biomass energy projects that use wood fiber, including electrical generation at forest manufacturing mills.
- Re-regulate electricity (as mentioned earlier).
- Work with industry to streamline forest regulatory system.
